

1. Notes

Please read this instruction sheet carefully before using the product and keep it for further reference.

All examples and pictures used here are for reference only.

Information provided in this Quick Start Guide are correct at the time of publishing.

IMPORTANT! This device should only be used with the power source indicated on the label. The voltage of power must be verified before using the device.

2. Packing Check

Please check the device and the accessories before using. For any damages, shortages or defects, please contact your dealer.

3. HDD Installation

This product series uses **SATA Type Hard Drive HDD**.

For your safety, please ensure the power is **OFF BEFORE** installation of the Hard Drive, this means disconnecting all power cables from the device.

- ① Loosen and remove screws to remove the device cover.
- ② Install the HDD to the bottom of the device (as pictured below).
- ③ Turn the device over to secure the HDD to the base with screws.
- ④ Reattach the cover and secure it with the screws.
- ⑤ Connect the power and data cables and turn on the device.
- ⑥ **Format HDD before using device.**

TIP:

Check the inside of the device to make sure cables are connected well before installing back cover.
