

FIBRE OPTIC SYSTEM

Fracarro's innovative Fibre Optic System has been designed for simplicity, cost effectiveness and reliability. Its small diameter glass fibre is pre-terminated for easy installation and connection. Immunity to electromagnetic interference is guaranteed! This makes the Fibre Optic System the perfect solution!

The Fibre transmitters and receivers distribute 4 satellite polarities and terrestrial signals over one single mode fibre optic cable with minimal signal loss and is ideal for reaching long distances.

WHY FRACARRO FIBRE SYSTEM?

- Only one fibre carries all signals (SAT, DTT, Analogue, CCTV etc.)
- Low power consumption: Low environmental impact
- Immune to electromagnetic interference
- Pre-terminated cables eliminate splicing costs
- Up to 24dB of Optical Budget

INSTALLATION EXAMPLE:
